

K-Series LightSelect

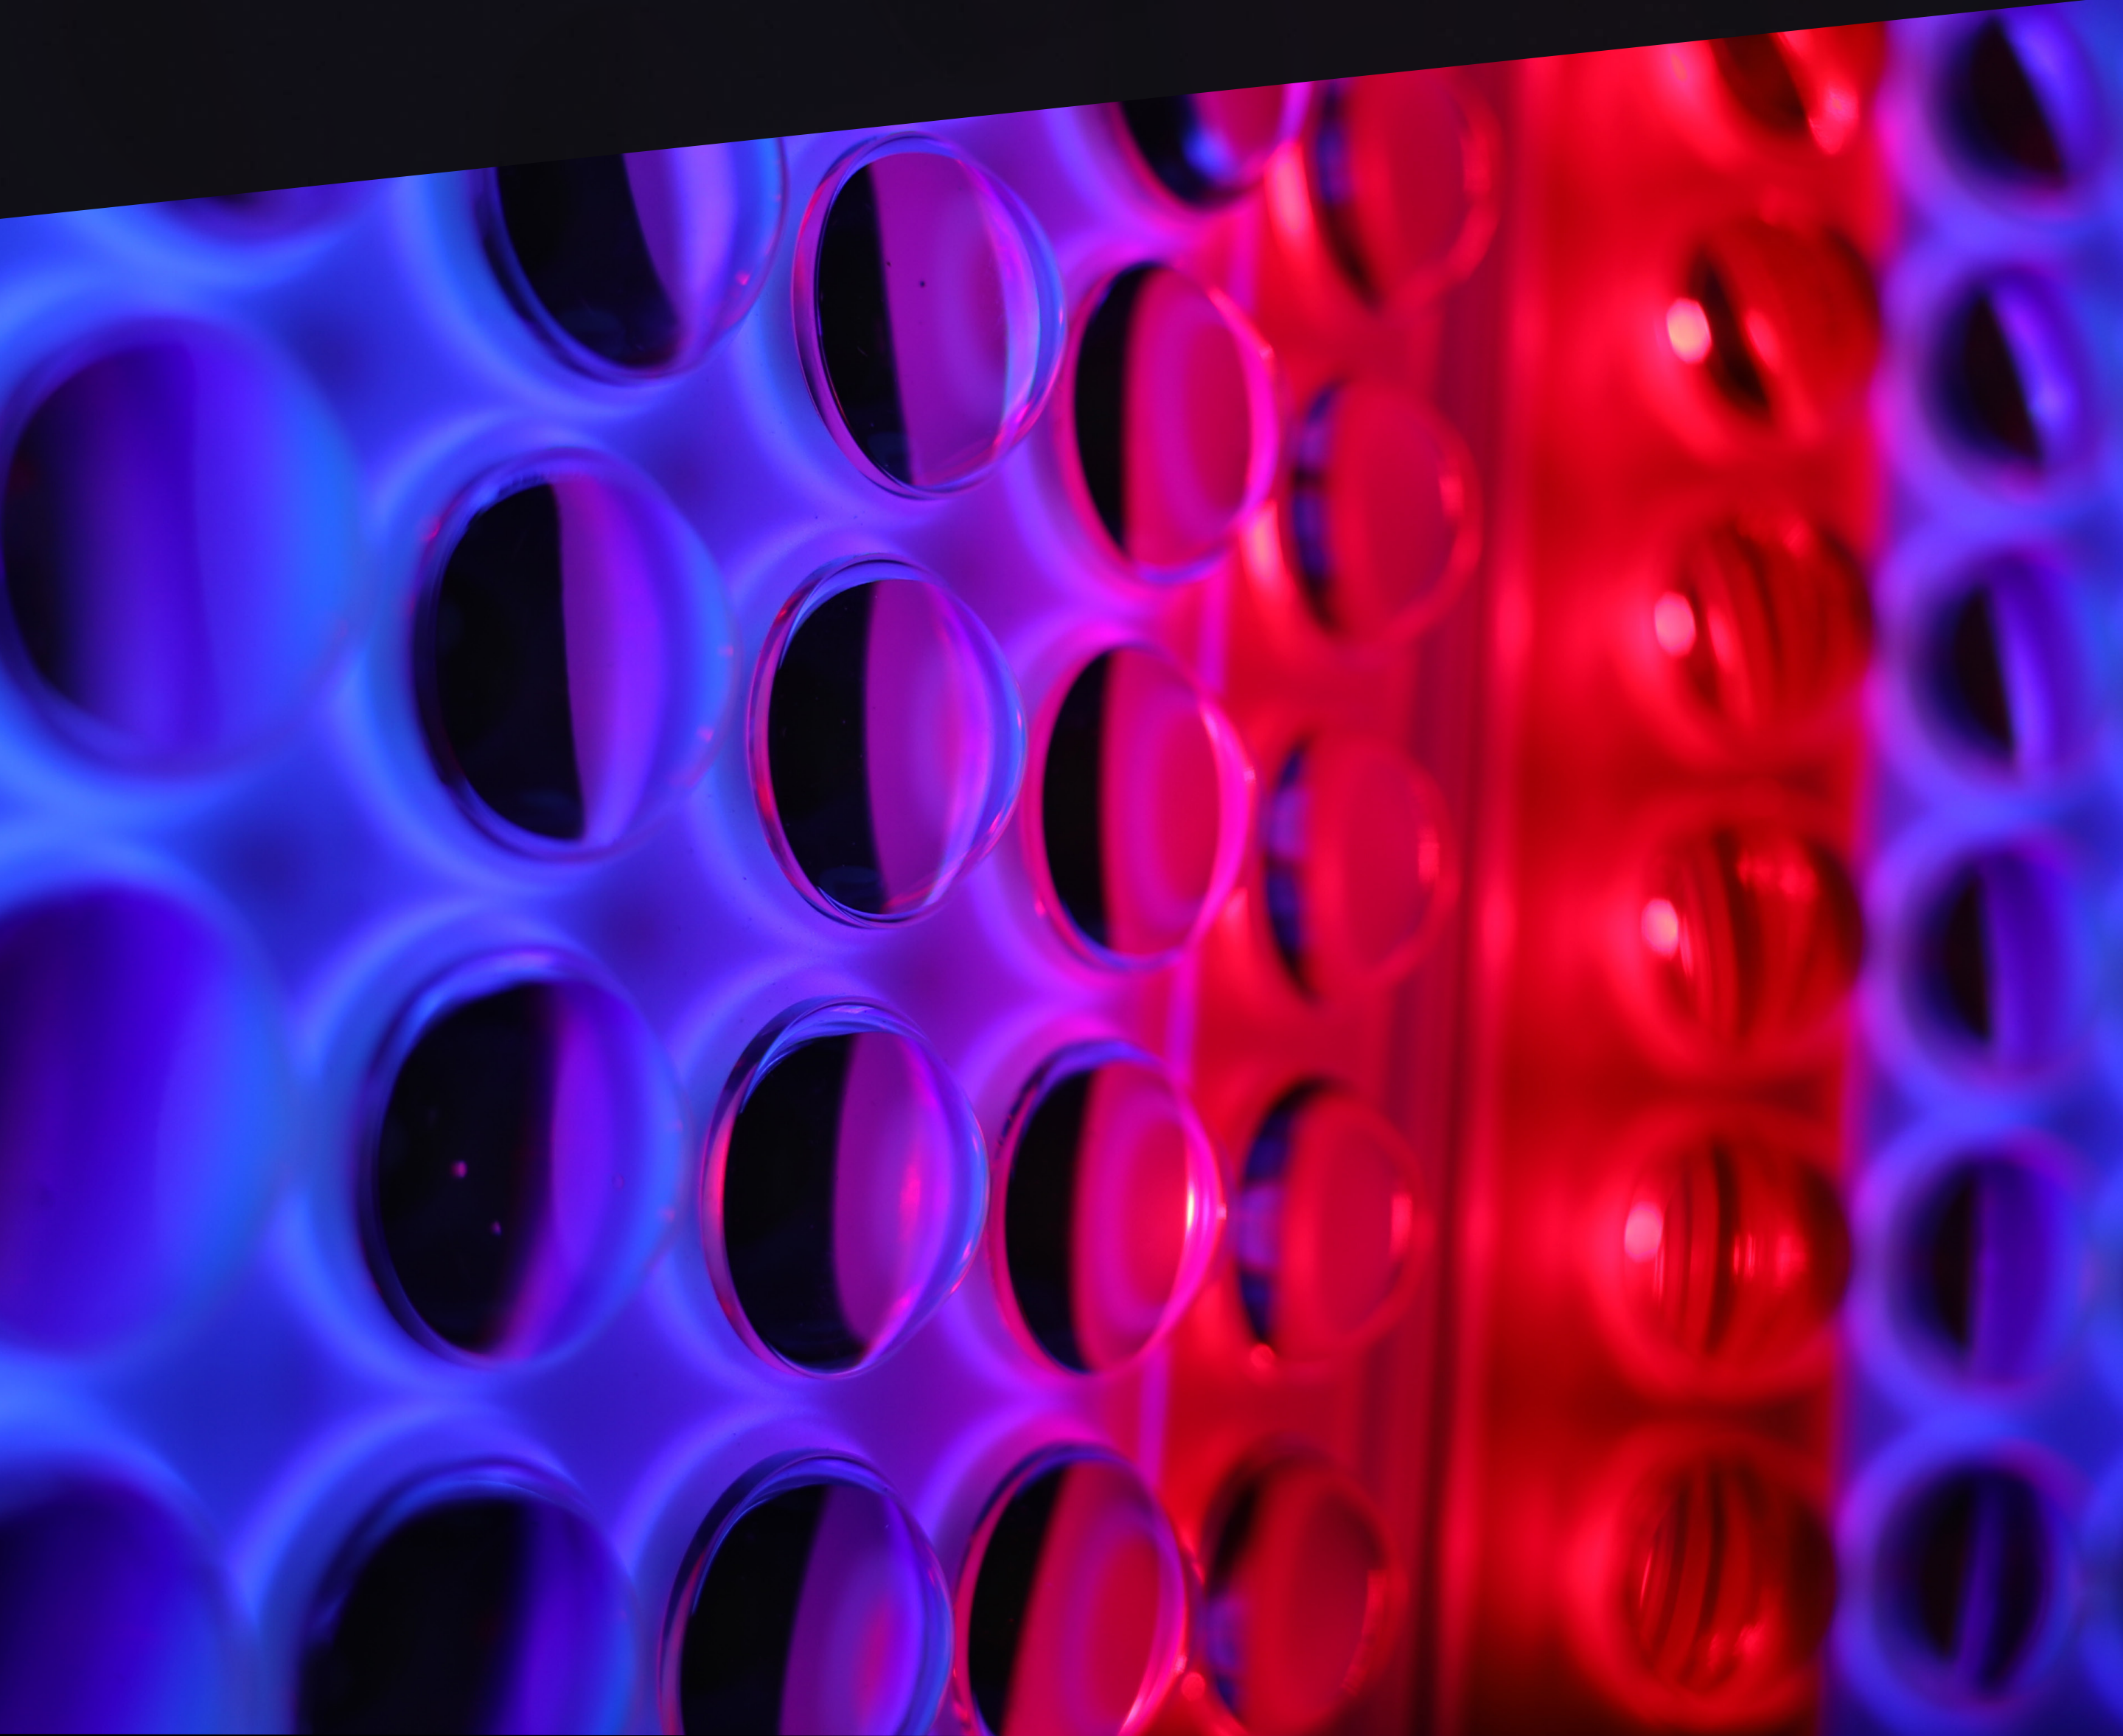

Developed by our lighting professionals, LightSelect offers the whole range of spectral and light combinations, from a soft beauty complexion to a pure feeling of summer to an all-round tan. In addition, you can build up a great pre-tan by using the spectral combinations in the right way - the right start to a relaxed vacation full of sunshine.

**PLEASE CONSULT A STUDIO EMPLOYEE
FOR AVAILABLE LIGHT SPECTRA.**

SUNSPHERE

A QUANTUM LEAP IN UV TECHNOLOGY.

FORM FOLLOWS SUNSHINE

High-performance LEDs generate the desired wavelengths for a beautiful and gentle tan. At the same time, aspherical lenses in front of the LEDs guarantee absolutely even illumination of the face and décolleté. See and feel the results instantly.

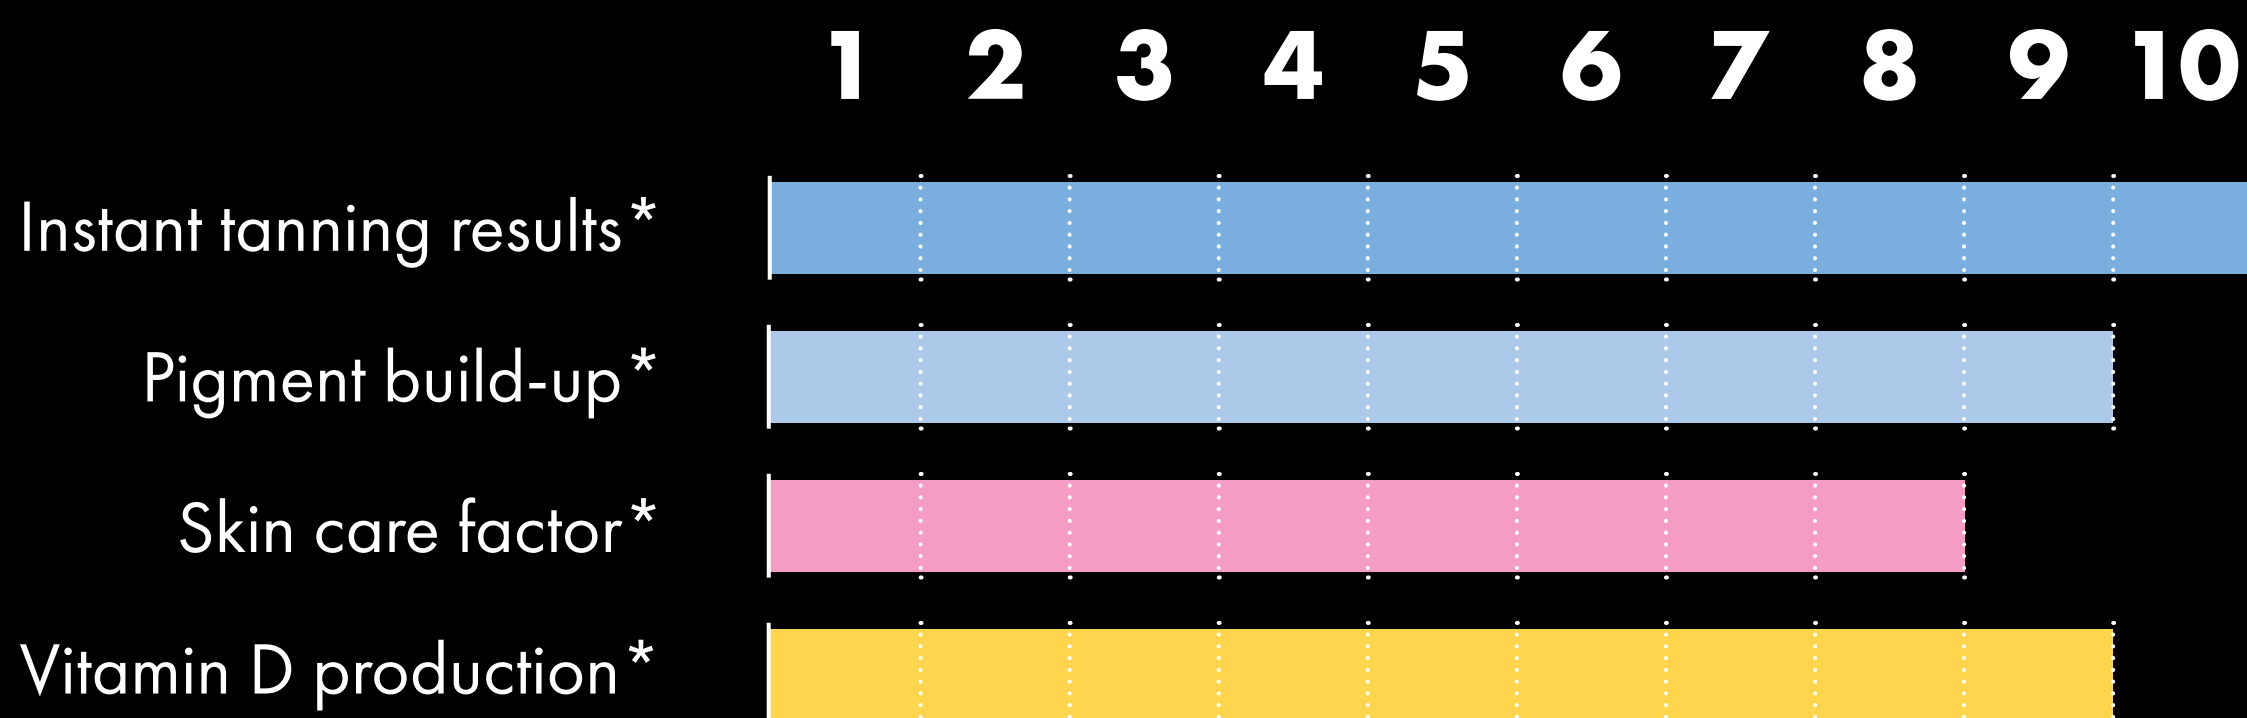

K-Series hybridSun

BE STRONG.

The "power pack" of intensive tanning sun light and beauty light for a particularly deep tan and a pleasant skin feeling. Blue UV light penetrates deep into the skin, activates pigment formation and ensures a direct tan.

Red beauty light promotes collagen formation for a better tanning effect and visibly beautiful skin.

K-Series extraSun

BE SPECIAL.

The pure "summer feeling" with intensive sunlight. pureSunlight intensifies pigment formation. ExtraSunlight tubes increase vitamin D production.

The high UVB content of the yellow extraSunlight creates a beautiful, long-lasting tan. With this combination, extraSun sparks the perfect summer feeling.

K-Series smartSun

BE SMART.

The smart alternative with a clever balance of intensive sunlight and skin-caring beauty light. The pink glowing „smartSunlight“ combines the power of two spectral ranges. This results in an immediately visible, intensive tan.

Vitamin D and collagen formation are stimulated - for a fresh complexion and velvety skin feeling.
